## A glimpse into the future of reinforced infrastructure projects

Techttextil India Symposium will organise an international conference on **Geotextiles and India's infrastructure: Paving insights for a better tomorrow** which will serve as a platform for exchanging knowledge, fostering collaboration, and promoting innovation in geotextiles and its applications at the 9th edition of Techttextil India, India's most focused expo on technical textiles and nonwovens.

By bringing together experts and stakeholders from various disciplines, the conference will contribute to the advancement and widespread adoption of geotextile solutions, leading to more sustainable, resilient, and cost-effective infrastructure projects.

## 1. Unveiling the geotextile landscape: exploring the current scenario and opportunities along with PM Gati Shakti

- |    |   |
|----|---|
| a. | Market Trends and growth opportunities in the geotextile industry |
| b. | Government initiatives and policies to promote geotextiles        |
| c. | Ecosystem perspective in the geotextile value chain               |
| d. | Diverse applications of geotextiles in construction               |
| e. | Indian position in Design Considerations and best practices       |

## 2. Harnessing geotextiles for enhanced infrastructure performance for roads and railways – a panel discussion

- |    |   |
|----|---|
| a. | Geotextile applications for enhanced infrastructure performance |
| b. | Environmental benefits of geotextiles in infrastructure         |
| c. | New Horizons for Nonwoven Applications in Geotextiles           |
| d. | Government support for geotextile implementation                |
| e. | Regulations and industry standards                              |
| f. | Design and development aspects                                  |

## 3. Exploring the Potential of Geosynthetics in Waterfront Structures

- |    |   |
|----|---|
| a. | Untapped opportunities in Indian waterways – user perspective |
| b. | Benefits of geosynthetics in waterfront structures            |
| c. | Geosynthetics for filtration & separation                     |
| d. | Geosynthetics for coastal engineering                         |
| e. | Innovation and advancement                                    |

## 4. Future prospects and key challenges – a panel discussion

- |    |  |
|----|--|
| a. | New product development                                    |
| b. | Key challenges faced by the Indian geosynthetic industry   |
| c. | Sustainable geotextiles                                    |
| d. | The way forward for budding entrepreneurs in geosynthetics |

\*The final conference agenda will be available closer to the show.

**To participate as a delegate or speaker, please contact**
